## SYMBOLS AND OTHER USAGES

The following symbols, where shown in columns of figures mean :

- n.a. not available
- n.y.a. not yet available
- nil or rounded to zero
- . . . not applicable
- p preliminary—figure or series subject to revision
- r figure or series revised since previous issue
- n.e.i. not elsewhere included
- n.e.c. not elsewhere classified
- \* subject to sampling variability, too high for most practical purposes
- break in continuity of series (where drawn across a column between two consecutive figures)

Yearly periods shown as, e.g. 1981 refer to the year ended 31 December 1981, those shown as, e.g. 1981-82 refer to the year ended 30 June 1982. Other yearly periods are specifically indicated.

The metric system of weights and measures is generally used. Values are shown in Australian dollars (\$) or cents (c). Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

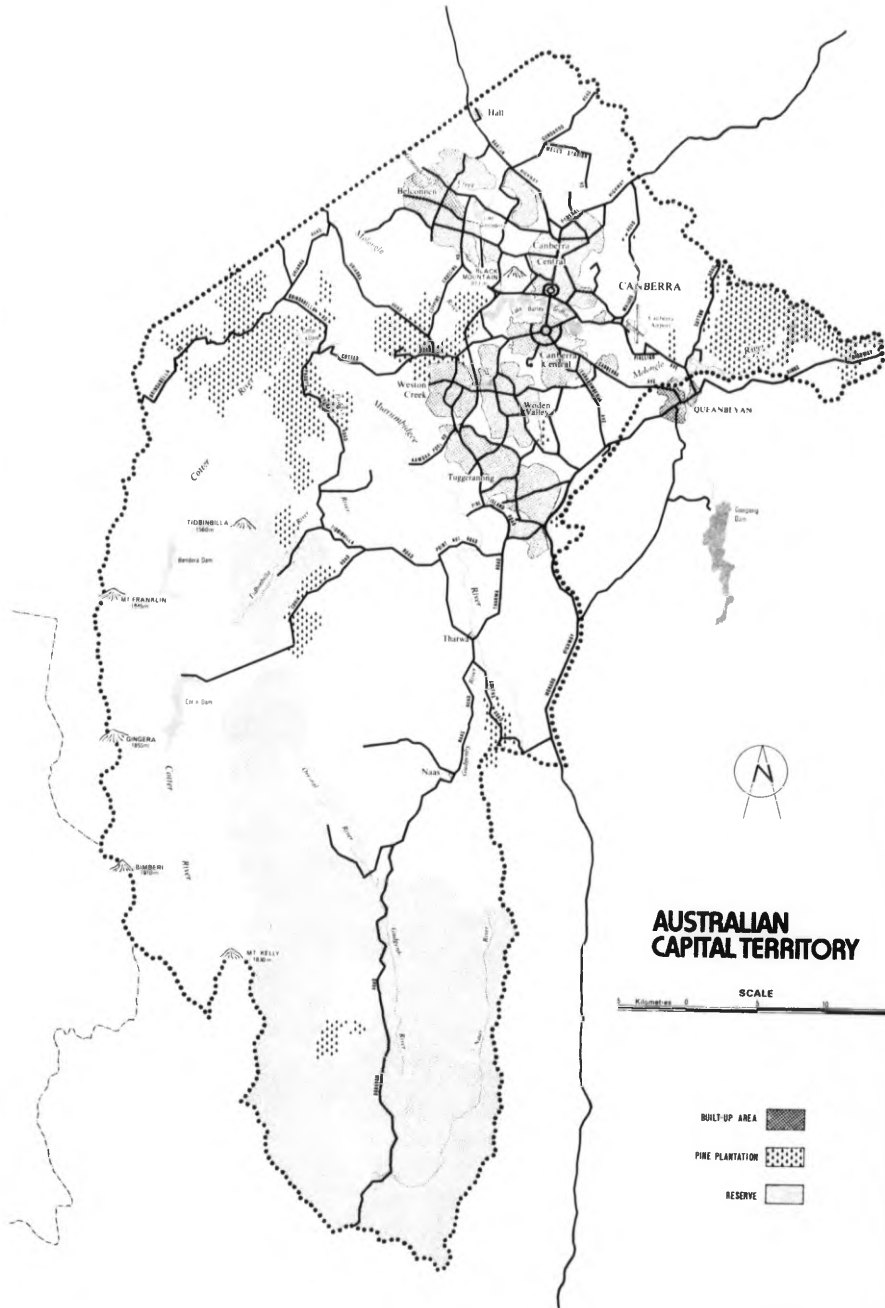

## **PREFACE**

This is the twentieth issue of this publication, which assembles in consolidated form the statistics of the Australian Capital Territory available in the ABS. The object of the Summary is to present as broad a range of statistics as possible.

The publication was redesigned for the 1979 edition with more emphasis being placed on statistics relating to such aspects as health, welfare and education.

(a) The rate represents the increase during the period expressed as a proportion (per cent) of the population at the beginning of the period. (b) Natural increase (excess of live births over deaths) expressed as a percentage of total increase. (c) Net migration (overseas and interstate) expressed as a percentage of total increase. (d) The sum of natural increase and net migration. (e) Census results. (f) Census counts, place of usual residence, adjusted for under-enumeration and including an estimate of A.C.T. residents temporarily overseas on census night. (g) Includes the effect of an intercensal adjustment. (h) Revised in the light of final 1981 Census results.

## COMPONENTS OF POPULATION GROWTH, A.C.T.

(a) Total increase is the sum of natural increase and net migration. However, from 1971 onwards the total increase figures include adjustments.

(a) Many divorces registered in the A.C.T. involve applicants normally resident in areas surrounding the A.C.T. In 1982, only about 55 per cent of A.C.T. divorces granted were to applicants normally resident in the A.C.T. The A.C.T. rate is therefore not a statistically accurate reflection of the extent of divorce among A.C.T. residents.

(a) In an Australia wide survey during February-May 1981, persons were able to report up to five medical conditions which related to their disabilities and therefore they may be included in more than one disabling condition category; however, they are only included once in the total and the sub-totals. (b) A disabled person is one who reported having one or more such disabilities or impairments as loss of sight or hearing, restricted use of limbs or having long term treatment or medication for a condition that continued to restrict the person in some way. The disabilities or impairments had to have lasted, or be likely to last, six months or more. (c) A handicapped person is a disabled person who was further identified as being limited to some degree in his/her ability to perform certain activities or tasks in one or more of the areas of self-care, mobility, communication, schooling or employment.

NOTE: More detailed definitions used in the survey are shown in the publication *Handicapped persons, Australia, 1981* (4343.0).

(a) Student and staff data relate to the 1981 teaching year. (b) Actual teaching hours performed by teachers over the teaching year. (c) Multi-modal students attend at least one unit of study internally and one unit of study externally at a given level or stream.

NOTE: 1981 student data are not compatible with previous years' collections. The new collection emphasises the individual student as the unit of reporting rather than enrolment as in the previous collections. Thus an individual student is counted *once* only in any one stream of study even though that student may record a number of valid and separate enrolments in that stream during the year. Some double counting of students does occur however where a student is enrolled in multiple courses that are not in the same stream.

## AVERAGE WEEKLY EARNINGS OF EMPLOYEES

In September quarter 1981 a new sample survey was introduced to produce the new average weekly earnings series. This survey replaces the average weekly earnings series based principally on information from payroll tax returns, and is designed to obtain from employers information in respect of a specified pay period each quarter.

2. More detailed information about the survey can be obtained from *Average Weekly Earnings, States and Australia, March Quarter 1983* (6302.0).
3. Background information on the reasons for the change from the payroll tax data to a direct collection is given in *Information Paper: Review of ABS Employment Statistics* (6239.0) published on 8 July 1981. A summary of the main differences in concepts, methods and coverage of the old and new earnings series is given in a further publication, *Information Paper: Average Weekly Earnings—New Series to Replace Former Payroll Tax Based Series* (6336.0), issued 24 March 1982.

## SURVEYS OF WEEKLY EARNINGS AND HOURS

Surveys conducted for a pay-period in October each year (November in 1982) provide statistics of average weekly earnings (i.e. gross earnings before taxation and other deductions) and average weekly hours paid for. The surveys exclude members of the defence forces, employees in agriculture and employees of private households employing staff. For detailed statistics, explanatory notes and definitions concerning the survey, reference should be made to publications *Earnings and Hours of Employees (Preliminary), Australia (6303.0)* and *Earnings and Hours of Employees, Australia (6304.0)*.

(a) Average overtime and ordinary time earnings and hours are averages for all employees represented in the survey. (b) Includes private and government employees. Excludes managerial, executive, professional and higher supervisory staff. (c) Details for October 1981 and November 1982 are not strictly comparable with results for previous years primarily due to significant differences in the sample framework. See *Earnings and Hours of Employees, Australia (6304.0)* for details.

(Base Year: 1980-81 = 100.0)

The Consumer Price Index has been compiled for periods from September quarter 1948. With the introduction of the tenth series in June quarter 1982 the reference base for most CPI series has been changed to 1980-81 = 100.0. A description of the index is contained in the booklet *A Guide to the Consumer Price Index* (6440.0).

\* From financial year 1980-81 a break in series has occurred as a new Building Activity Survey has replaced the previous Building Operations Census. Consequently figures from 1980-81 at. not strictly comparable with those for earlier years and some caution should be exercised in comparing previous data. Further details of the changes in collection methodologies and their implications can be found in the September quarter 1980 issue of *Building Activity, Australian Capital Territory* (8706.0).

(a) Based on latest available population figures. (b) Average number of motor vehicles (excluding tractors, plant and equipment, caravans and trailers) on register. (c) In the past injured included any persons requiring surgical or medical treatment as a result of a road traffic accident. As the term medical treatment is open to a wide variety of interpretations, the definition of injured has been changed to include only those persons who were admitted to hospital. For this reason 1980 figures relating to casualty accidents and injured persons are not comparable with those of earlier years.
